Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagel, US #6,266,906 in view of Dufresne, US #5,967,343.
3. Nagel teaches a label holder component, 11, 14 joined at the bottom and separate at the top, hinge 15 separating the label holder portion from mounting portion 20, and sign mounting channel 28. The upper end of the channel is connected to the hinge through the label holding portion. Nagel does not teach the sign mounting channel as being on the back panel or the sign component disposed at a right angle.
4. Dufresne teaches a display assembly including sign component (Figure 6B). It would have been obvious to a person having ordinary skill in the art to utilize the sign mounting component on the display of Nagel to create a display that sticks out from the label, and is therefore more noticeable, as is taught by Dufresne.
5. Dufresne teaches a sign component (Figure 6B) having a tongue-like mounting portion. The display of Dufresne will swing if disturbed.
6. Dufresne does not teach the specific dimensions as described in the instant claims, however, it would have been obvious to one of ordinary skill to utilize a sign of such appropriate dimensions as to portray the desired message.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent 5197215 is cited as of interest.
